## **1. Introduction**

As per Section 12.1 of the Municipal Elections Act, 1996 as amended, this plan will address the specific accessibility requirements in relation to the 2026 Ward 3 By-Election in the Town of Greater Napanee.

The Town of Greater Napanee has made great efforts to promote a barrier-free community. To ensure that the 2026 Ward 3 By-Election is consistent with the core principles of the Accessibility for Ontarians with Disabilities Act, 2005, this planning document was developed in advance of the election to identify measures to be taken and reported to Council following the election.

## **2. Objectives**

This plan is intended to highlight measures that the Town of Greater Napanee will implement to ensure equal opportunity for all electors and candidates. These objectives include:

- i. That persons with disabilities can independently cast their vote and verify their selection.
- ii. That persons with disabilities have full and equal access to all information about where and when to vote and about the candidates.
- iii. That persons with disabilities can fully participate in the Municipal Election as an elector or candidate.
- iv. That efforts are made to ensure that electors with disabilities are aware of the accessibility measures available via channels such as the newspaper, media releases, the Town of Greater Napanee website and social media.
- v. That Voter Help Centres are accessible.

## **3. Development of the Plan**

This Plan is a "living" document which will be improved and updated as best practices are identified and new opportunities for improvement arise.

Several steps were taken to develop this plan and ensure that the statutory requirements are met. Through the development and implementation of the 2026 Ward 3 By-Election Accessibility Plan, election staff will:

- i. Review and analysis of documents, policies and other supporting materials from AMCTO, neighbouring municipalities, the Ministry of Municipal Affairs and Housing, technology suppliers and other various stakeholder groups.
- ii. Establish staff training standards and practices directly related to the election to ensure that persons with disabilities can vote in a positive customer service environment and ensure that all Election Officials recognize that a voter's needs shall be accommodated.

## **4. Voting Methods**

For the 2026 Ward 3 By-Election, the Town of Greater Napanee will be working with Intelivote Systems Inc. to provide eVoting services to eligible voters. This includes the convenience and independence of voting:

- i. From anywhere in the continental North America including Mexico via telephone;
- ii. Via internet from anywhere in the world where internet access is available; or
- iii. In-person at a Voter Help Centre during the January 9 – 19, 2026 voting period.

Everyday electronics such as computers, telephones and other aids can provide accessible opportunities for persons with disabilities to accomplish more, while being consistent with the principles of independence, dignity, integration and equal opportunity.

The Intelivote Voting System provides voters with the capability to vote from the comfort of their own homes. Voting from home facilitates the voting process for persons with disabilities who may have mobility restrictions, visual impairment, and/or have difficulty with transportation. Additionally, persons who have assistive devices set up in their homes can use the devices to assist with casting a ballot privately and independently.

By providing voters with a multitude of voting options, the aim is to increase voter turnout from persons with disabilities and increase their independence and privacy in the election process. This provides persons with disabilities the same independence and privacy in participating in the election process as other voters. However, if persons with disabilities do require assistance in the voting process, trained Election Officials will be present at an in-person Voter Help Centre offered by the Town of Greater Napanee, throughout the voting period.

#### **4.1 Telephone Voting**

To access an audio ballot and vote, eligible voters may use a touch-tone telephone, and the toll-free telephone number, date of birth, and PIN contained in their Voter Information Letter.

Communication barriers can make it difficult for people to receive or convey information. Barriers may be identified as low volume, use of language that is not clear or plain, and confusing or unorganized menu options.

The Intelivote Voting System provides the following:

- Service on all types of touch-tone phones and wireless devices.
- Clear, plain language.
- Easy to follow menu options, advising when to select options and provision of confirmation of the voter's selections.
- Standard volume is used to allow for adjustment dependent of the telephone or device being utilized.

#### **4.2 Internet Voting**

Eligible voters may vote online using a smart phone, tablet device, gaming device or computer and any accompanying assistive devices or software, along with their date of birth and PIN and qualifying information, to access the internet address provided in their Voter Instruction Letter.

The Intelivote Voting System has been created to meet the Web Content Accessibility Guidelines (WCAG-2 Level AA). Persons with disabilities can perceive, understand, navigate and interact with the online voting system. It is compliant with the World Wide Web Consortium website principles, which include organization, functionality and readability of the information provided, as well as alternative ways of representing information, such as with audio.
